## SUMMARY

A university student with a strong enthusiasm for backend software development and UX flow design. I enjoy exploring new technologies and concepts, believing that nothing in this world is truly unreasonable as long as we take the time to understand it. Constant learning drives me, and I thrive on turning complex ideas into practical and user-friendly solutions.

## PROJECTS

### GEx Internal Operations System (Personal Project)

- Built a web-based internal operations system for shipment management and verification.
- Improved workflow efficiency 3x and reduced system-related costs by up to 200x.
- Focus: Backend logic, database structure, system integration.

### Growing — Notes App (Dicoding Capstone, Team Project)

- Developed a full-featured Notes application with authentication, multilingual support, and theme toggling.
- Implemented RESTful API integration and structured page routing.
- Collaborated in a team following modern frontend development practices.

## EXPERIENCE

### Co-Founder & Operations Lead, GEx

2021 - Present

- Co-founded and scaled a logistics and expedition company from scratch with my team.
- Achieved operational growth of 4 tons of shipments per month.
- Managed business development, customer acquisition, and day-to day operations.
- Built an internal web system that boosted operational efficiency by 3x and reduced system costs by up to 200x.

### Bootcamp Participant – Full-Stack Development, Dicoding Indonesia

Apr 2025 - Aug 2025

- Completed intensive training in Front-End (React.js) and Back-End (JavaScript).
- Collaborated in a final team project to build a functional web product.
- Gained hands-on experience in modern web development and deployment.

## EDUCATION

### Bachelor of Computer Science

2024 - Present

BINUS University

- Major in Computer Science.
- Currently in 4th semester, focusing on software development and problem solving.

## ADDITIONAL INFORMATION

- Technical Skills:** Backend Development, RESTful API Design, Database Design, Efficient SQL Querying, Version Control, Cloud Integration, Responsive Design.
- Languages:** Bahasa Indonesia, English.
- Certifications:** Fundamental Back-End Development with JavaScript (Dicoding), Building Web Applications with React (Dicoding), React & Back-End Developer Bootcamp (Dicoding)
- Activities & Community Involvement:** Member at Dicoding Developer Community, Member & Content Talent at Ikatan Pemuda Baalwy
